TMA 2013

GI Symposium

The 16th IEEE International Global Internet Symposium(GI 2013)

HOME   **CALL FOR PAPERS**   **COMMITTEE**   **PROGRAM**

Scope and Topics

The IEEE Global Internet Symposium aims to provide a forum for researchers and practitioners to present and discuss advances in Internet-related technologies. The focus of the symposium is on experimental systems and on emerging future Internet technologies, and especially on scaling such systems to a global scale. The Program Committee encourages original submissions describing promising work in progress, speculations about the future of the

Internet, and progressive position papers (which should be clearly marked as such).

The proceedings of the 16th IEEE Global Internet Symposium will be published on-line through the IEEE Xplore Digital Library after IEEE Infocom 2013 concludes.
